I thought this was broken because the Achievements spam out over the top of the Next button and as the other review points out, the game doesn't do anything to indicate you've passed the level; so this just seems like broken nonsense from the start when really that only deserves occur a few minutes later.

I went through probably 10 or 11 levels and then I can't tell if as the other review notes, the Next button stops working because the game is over or if there is a graphical glitch because the assets are so poorly aligned that the square can't get to end of level target because why would people test an achievement spam game on Steam.

Shame, because I quite like the tap a thing through a maze of stuff genre; this mistreats it.. Feels sloppy and unfinished. I'd rather play qop series again.. I liked the game, it is a simple puzzle game, but can still take some time to solve. But with only 10 levels until you get to a level that is too bugged to finish, you're done playing in fifteen minutes and only have to wait till you get all the achievements.. Easy little game for Achievements. not bad very well. The shortest and the easiest puzzle game I played in my life!. I played to 3 games from this developer so far and on every each of them the hit boxes are wron

defined. It isn't that hard doing so in the gamemaker...
Anyway, this is another achievement spam game with very basic gameplay and boring progresion.

Make yourself a favor and don't waste your money on this junk. Good idea, I like it this puzzle game but it could have been a little harder.

Feels sloppy and unfinished. I'd rather play qop series again.. You get what you paid for, 5K achievements at minimum price. If you're an achievement hunter looking to increase the number of achievements on your profile showcase, then I highly recommend buying this. Else don't waste your money. This is not a game, it's just a way of distributing achievements.
