Steps To Install 1. Download the latest version from Packed. Run "mkrel.sh". 2. You will need 4 files: the New-nsp, the New-head, the new-body and the New-hd-files. The New-nsp file: It contains all the information the PS2 needs to operate. The New-head file: It contains all the information the PS2 needs to operate. The New-body file: It contains all the information the PS2 needs to operate. The New-hd-files: It contains the USB string for the HDD string. 3. Now, you will need your PS2. Make sure it has USB and HDD. Run "USB-HDD-HD-PROGRAM-USB-HERE.exe". 4. When it completes, run "mkrel.sh". 5. "HDL Dump Helper GUI" GUI will be opened in the ps2_browser directory. If the GUI didn't show up, run "mkrel.sh" again, but this time, the New-nsp and New-hd-files are located in your ps2_browser directory. 7. Now, you will need to make a USB string with "USB-HDD-HD-PROGRAM-USB-HERE.exe" 8. Do the following: - Put all the games in the HDD directory. - Open the "HDL Dump Helper GUI" GUI. 9. Select a game, and install it. 10. Start the HDD or USB, and you are done. And, you are ready to play the game. You will find the games you put into the HDD directory on the HDD. New-nsp hdls/nsp/nsp New-head hdls/head/head New-body hdls/body/body New-hd-files hdls/hd-files/hd-files.lst open your game directory and copy this files to it.
